# UNIX

### BASE DE LA GRANMAYORÍA DE LOS SISTEMAS OPERATIVOS

```
blo8fablo:-5 sort --help
sage: sort [OPTION]... [FILE]...
or: sort [OPTION] ... -- fileso-from=F
rite sorted concatenation of all FILE(s) to standard output.
andatory arguments to long options are mandatory for short options too.
rdering options:

    -b, --ignore-leading-blanks ignore leading blanks

    -d. --dictionary-order consider only blanks and alphanumeric characters

                            fold lower case to upper case characters

    g, --general-numeric-sort compare according to general numerical value

    -i, --ignore-nonprinting consider only printable characters

 -M. --month-sort
                            compare (unknown) < 'JAN' < ... < 'DEC'
 -h, --human-numeric-sort compare human readable numbers (e.g., 2K 1G)
 -n. --numeric-sort
                            compare according to string numerical value
 -R. --random-sort
                            sort by random hash of keys
    --random-source=FILE get random bytes from FILE
 -r. --reverse
                            reverse the result of comparisons
                            sort according to WORD:
                              general-numeric -g, human-numeric -h, month -+
```
